We don't measure success only by the number of sessions we deliver, but by the impact we create on trainers, participants, and organizations.

"The experience challenged me to reflect on my own training style. I gained not only new tools, but a new perspective on leadership, facilitation, and learner engagement."

Christina Merhej

"Participating in the T.O.T. program was a truly transformative experience. The training was engaging, practical, and empowering, giving me tools and strategies that I can immediately apply in both my personal and professional life. The facilitators created a supportive and inspiring environment that encouraged growth, reflection, and action. I left the program feeling more confident, focused, and motivated to make a positive impact. I highly recommend this journey to anyone seeking to develop their skills and mindset."

Joelle Gerges

"I chose mindnavy for my ToT certification because of their reputation for excellence. I highly recommend mindnavy for anyone looking to level up their training standards and the desire the lead any room."

Sherine Kefrawi

"The TOT program strengthened my ability to design impactful, learner-centered curricula grounded in both theory and practice. It refined my approach to teaching techniques, assessment, and technology integration. Since completing the program, I have applied these skills in teacher training, academic coordination, and CBT-informed educational workshops."

Jaafar Shehadi

Serving global institutions, NGO's, and forward thinking companies accross sectors

You're Not Here to Learn Like Everyone Else

You've stepped into a different way of thinking.
This is where growth becomes transformation.

We believe in growth,
diversity, and human potential;
activated through learning.

Free Consultation

A Learning Partner Focused on Real Impact

Mindnavy designs learning, leadership, and organizational development experiences that help people and teams grow with purpose.

We work with NGOs, corporate teams, and institutions across sectors to build capabilities that last.

This is not one-off training.
This is learning designed for long-term performance and evolution.

We don't just build skills.
We build people who evolve and lead.

Where It All Began

It Started With a Decision

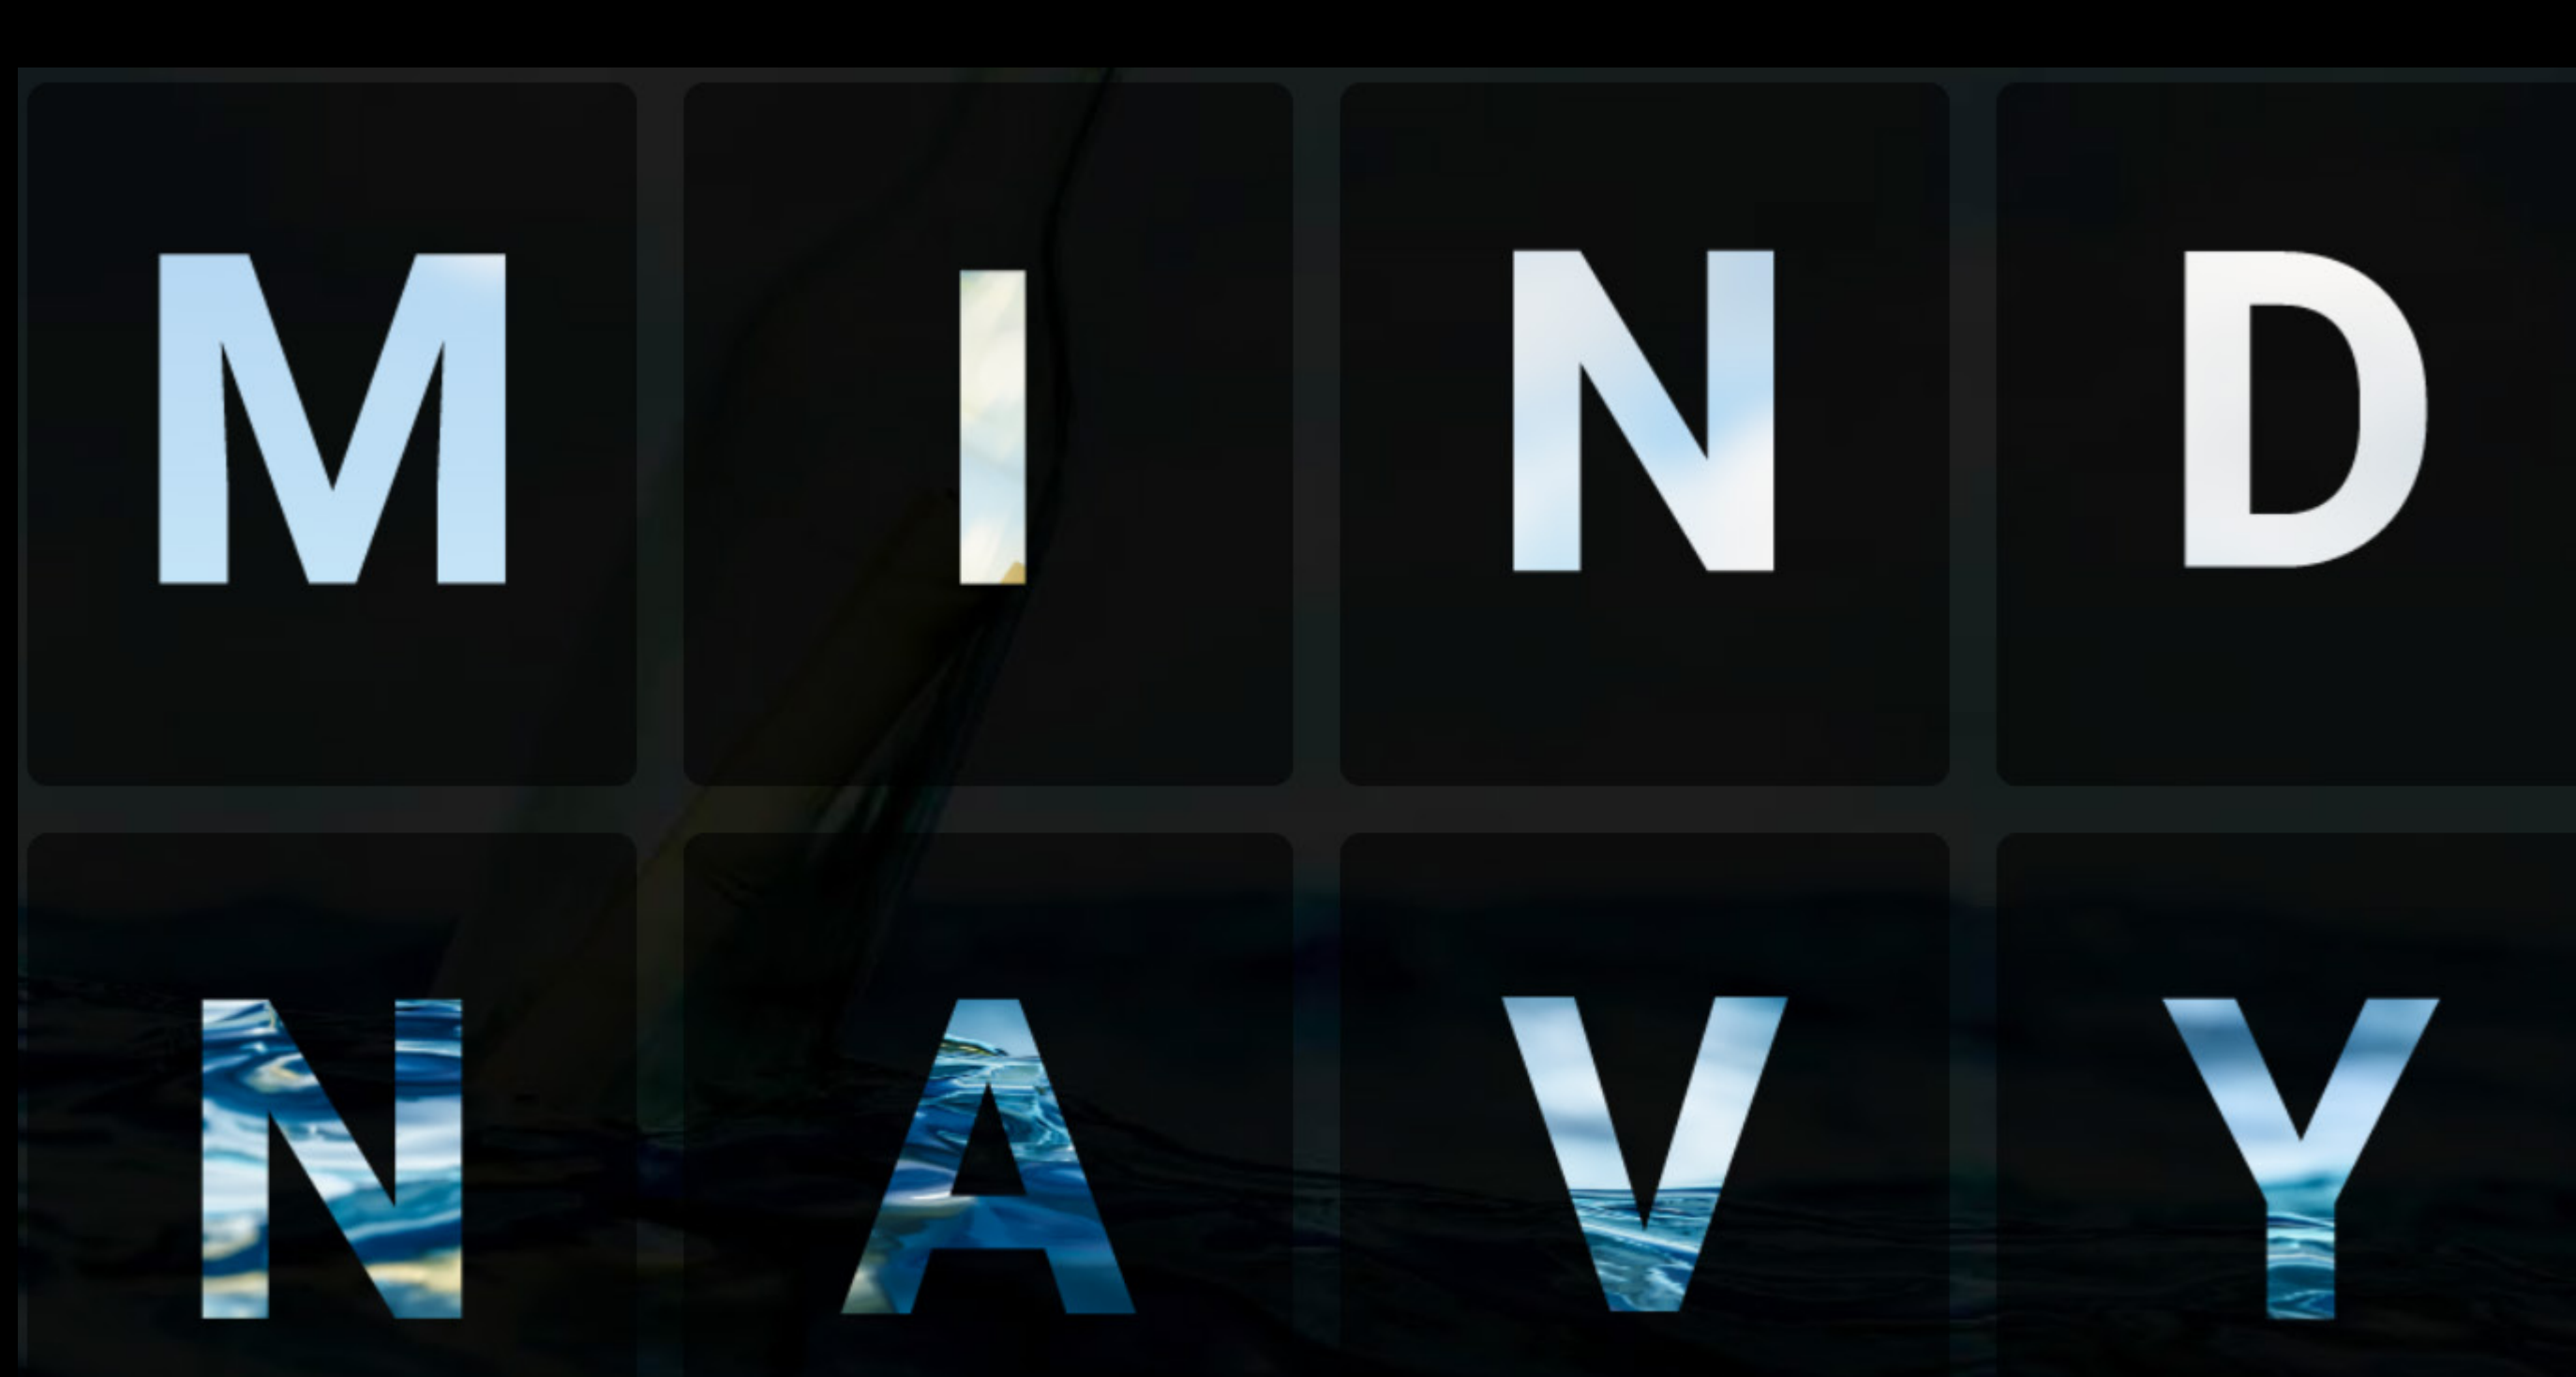

It didn't start from a lack of skill. It started from a need for something more.

Nahi Al Jawad and Mostafa Shehadi were already strong trainers; delivering impactful sessions across organizations.

But traditional training felt limited; focused on delivery, not real transformation.

In 2021, they chose a different path.
To build something of their own.

Not just to train;
but to redesign how people learn, grow, and lead.

How We Work

Built Around People

We design experiences that are:

Practical
Engaging
Relevant

Always connected to real challenges.

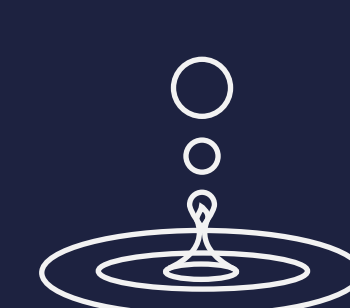

Ecosystems

Where We Work

Where We Work

NGOs. Corporate teams. Communities.
Individuals.

Different environments.
Same goal: growth that lasts.

Difference

More Than Training

We don't just deliver sessions.
We build capability.

Mindnavy Credo

We believe in **growth and development** as vital attributes of success. Our message celebrates **humans diversity** and accepts differences in **culture, background, and beliefs**. We believe in energy and admire **brain power** to highlight potential and **accentuate talent**. We share everything with everyone and do what **we say and believe**.

It is our responsibility to create change and **trigger transformation**. We attribute the revival of communities to **increased awareness**. We are moving the needle towards epic **performance and immense knowledge**. We will always strive to have an impact and influence.

We oversee the **capabilities and invest in the aptitude** of the men and women who work with us and join our forces. We must recognize their **uniqueness, acknowledge their dignity, and respect their merit**. We have to match our objectives to their admiration and turn our network into an opportunity for its **expansion and evolution**. Then, generate a community of highly evolved beings. Only through this kind of unified, cooperative effort can we hope to **support a non-competing environment**.

We need to be **mindful of the methods of innovation** to sow the seeds of **personal and public victory**. Our tools must be **creative and visionary** to bring forth solutions at the level of individuals and communities.

Along with experimenting new ideas and yielding output to **accomplish our aspirations**. We ought to create balances between machines and humans, **between technology and cosmology**. To achieve this, we must be intentional about cultivating a **culture of collaboration**.

We believe in the vigor of a **mindset empowered by the zest of emotions and the force of discipline and action**. Also, we believe in the liveliness and spark of the spirit. We must synergize our **eternal intelligences with our internal souls**. We must need nothing. We must feel **internal abundance** and **unconditional love** in **all aspects** of our lives.

Start with yourself. Your transformation starts here

**This is not about becoming a trainer.
It's about becoming someone who can influence,
engage, and create real impact.**

VIDEO

The System Behind Great Trainers

Design

Create structured, engaging learning
experiences

Deliver

Speak with clarity, confidence, and
presence

Transform

Move people from understanding to
action

Stop Presenting. Start Impacting.

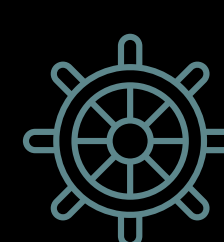

Most trainers deliver content. Few create transformation.
TOT helps you bridge that gap.
